Why Venus Bay is at risk of bushfire

Fire Authorities have assessed Venus Bay as having a VERY HIGH bushfire risk. Local residents and visitors should be prepared for fire and have a plan for when the Fire Danger Rating is SEVERE, EXTREME or CODE RED.

This community information guide includes a map containing key elements of Venus Bay’s bushfire risk. At the time of publication, there are NO designated Neighbourhood Safer Places – Places of Last Resort at Venus Bay.

Important community bushfire safety information is provided to help you make informed decisions about how to survive a bushfire, whether you’re a local resident or a visitor to the area. Planning and preparation can save lives in a bushfire. Use this community information guide to help you and your family to prepare.
**Prepare**

It’s important if you live, work and travel in this area, to plan what you will do if a bushfire threatens.

**Understand your bushfire risk**

- Venus Bay has been assessed as having an VERY HIGH bushfire risk in accordance with the Victorian Fire Risk Register.
- This assessment takes into account local factors such as high fuel loads.
- Assess and prepare the capability of your property to withstand a bushfire.
- Be aware it is impossible for emergency services to protect every individual home or property.
- Bushfires move more quickly uphill, so properties situated on hills or ridges will be at greater risk.
- Remember your usual travel routes may be limited or blocked. Know your local roads.
- In extreme wind conditions and without any occurrence of fire in the area, roads and tracks may become blocked by falling trees preventing residents from leaving early.

**Reduce your bushfire risk**

- Homes with too much vegetation and other flammable materials close to them are difficult to protect from bushfires.
- Take advantage of rubbish removal and green waste disposal opportunities.
- Prepare your home and property against bushfire, burning embers and radiant heat.
- Even if your plan is to leave early, a well-prepared home has a greater chance of not being destroyed by bushfire.
- Assist your neighbours to reduce their bushfire risk as this may help to make your property safer.
- **Develop and practise your Bushfire Survival Plan.**
- **You will also need to plan for your pets’ safety.**
- You can attend or join:
  - A local Fire Ready Victoria meeting
  - A Bushfire Planning Workshop
  - A neighbourhood Community Fireguard Group
- **The Household Bushfire Self-Assessment Tool is available to help individuals assess the bushfire risk on their own property.**

You can download the CFA FireReady kit, containing the full Leaving Early Planning Template from [cfa.vic.gov.au](http://cfa.vic.gov.au), or call 1800 226 226 (TTY 1800 122 969)
Venus Bay Bushfire Threat Map

Please note:
Severe bushfire activity can also occur outside the threat areas.
Spot fires can start, move quickly and come from many directions.
Fires can be uncontrollable, unpredictable and very fast moving.
Leave early

Leaving early is always the safest option.

Leaving early is more important when:

• The Fire Danger Rating is CODE RED. Homes aren’t designed to withstand a bushfire during these conditions. Any fire that starts and takes hold will be so intense that you won’t be safe to stay and defend your home – no matter how well prepared it is.

• There are children, elderly or disabled people in your home. People who are vulnerable due to age, health or any other reason, should always leave early.

• You have not prepared yourself or your property to give you and your home the best level of protection from a fire.

• Your house is not defendable. Some homes are not safe to defend because of their location or construction.

If you plan to leave, then you should leave well before a fire reaches your area and well before you are under threat. Follow the actions recommended for the Fire Danger Rating of the day (see pages 6 and 7). Visit CFA website www.cfa.vic.gov.au

Where will you go?

• Is it a safe choice? You may choose somewhere that suits your personal needs and circumstances, e.g. a family member’s house in an urban area with a backyard for your pet, or shopping centre complex, or central business district of a large regional centre.

• If you don’t have any other options you may wish to consider the following townships: Wonthaggi or Leongatha.

• Always tell someone that you are leaving and where you are planning to go.

• If there are older members in your family or young children, this should be considered when choosing the destination in your Bushfire Leave Early Plan.

If you - or someone you care for - will need help to prepare and leave early when there is high fire risk, obtain a Red Cross Bushfire: Preparing to leave early guide at www.cfa.vic.gov.au or request a copy by phoning the VicEmergency Hotline on 1800 226 226
Strong winds and bushfires may cause trees or large branches to fall.
- Burning roadside vegetation will create radiant heat.
- Beware of emergency vehicles and other traffic on roads.
- Smoke may reduce visibility.

How you can stay in touch
- Follow CFA on Twitter (www.twitter.com/cfa_updates).
- Join the CFA Facebook page (www.facebook.com/cfavic).
- Download the VicEmergency app if you have a smartphone or tablet Apple (App Store) and Android (Google play).
- Beware, cordless home phones will NOT work if the mains power supply is cut.
- Wireless communications, internet and land lines may vary between service providers.
- Mobile phone coverage in and around Venus Bay is generally good, but may not be accessible during times of emergency and may vary between service providers.
- There is no community-alerting siren operating in this township.
- Sirens sounding nearby are a trigger for you to seek information, as they may indicate fire activity in your area. When you hear a siren, further information may be available via ABC local radio, commercial and designated community radio stations, and SKY News TV (see page 16).
- Regularly observe what is happening outside and check all information sources.

A written fire plan may save your life - would you remember a plan that’s just in your head if your surrounded by smoke, heat, flame and noise?
What does it mean? What should I do?

These are the worst conditions for a bush or grass fire. Homes are not designed or constructed to withstand fires in these conditions. The safest place to be is away from high risk bushfire areas.

Leaving high risk bushfire areas the night before or early in the day is your safest option – do not wait and see. Avoid forested areas, thick bush and long, dry grass.

Know your trigger.

Make a decision about:
– when you will leave
– where you will go
– how you will get there
– when you will return
– what you will do if you cannot leave

EXTREME

Expect extremely hot, dry and windy conditions. If a fire starts and takes hold, it will be uncontrollable, unpredictable and fast moving. Spot fires will start, move quickly and will come from many directions.

Homes that are situated and constructed or modified to withstand a bushfire, that are well prepared and actively defended, may provide safety.

You must be physically and mentally prepared to defend in these conditions.

Consider staying with your property only if you are prepared to the highest level. This means your home needs to be situated and constructed or modified to withstand a bushfire, you are well prepared and you can actively defend your home if a fire starts. If you are not prepared to the highest level, leaving high risk bushfire areas early in the day is your safest option.

Be aware of local conditions and get information by listening to ABC Local Radio, commercial and designated community radio stations or Sky News TV, going to www.cfa.vic.gov.au or call the VicEmergency Hotline on 1800 226 226.

SEVERE

Expect hot, dry and possibly windy conditions. If a fire starts and takes hold, it may be uncontrollable. Well prepared homes that are actively defended can provide safety.

You must be physically and mentally prepared to defend in these conditions.

Well prepared homes that are actively defended can provide safety – check your bushfire survival plan.

If you are not prepared, leaving bushfire prone areas early in the day is your safest option.

Be aware of local conditions and get information by listening to ABC Local Radio, commercial and designated community radio stations or Sky News TV, going to www.cfa.vic.gov.au or call the VicEmergency Hotline on 1800 226 226.

VERY HIGH

If a fire starts, it can most likely be controlled in these conditions and homes can provide safety.

Be aware of how fires can start and minimise the risk.

Controlled burning off may occur in these conditions if it is safe – check to see if permits apply.

Check your bushfire survival plan.

Monitor conditions.

Action may be needed.

Leave if necessary.

HIGH

LOW-MODERATE

Triggers

Note your district’s Fire Danger Rating daily as your trigger to act.

Understanding Warnings

• A warning will be issued when any type of emergency could impact you or your property.

• Warnings aim to provide you with the best advice and information on what is happening to help you make good decisions to protect yourself and others.

• Remember: don’t rely on an official warning to leave. Emergencies can start quickly and threaten you within minutes.

• Always use more than one source for your emergency information.

Evacuation

You may be advised to evacuate by police or emergency services. In fast-moving situations, you may not always receive a warning or recommendation to evacuate. Stay informed, aware of local conditions and the Fire Danger Rating, so that you can plan ahead and make the right decision in a bushfire. Leaving early is always the safest option. Refer to ‘Community Evacuation Information’, available at www.police.vic.gov.au

Should a recommendation to evacuate be made, the following advice would apply:

• A fire is rapidly advancing.

• If advised, travel to the evacuation destination as advised by emergency services.

• Strictly follow all instructions and advice.

Community information

• A newsletter containing updates for communities affected by an emergency.

• Can also be used as notification that an incident has occurred but there is no threat to community.

Advice

• An incident is occurring or has occurred in the area. Access information and monitor conditions.

• Can also be used as a notification that activity in the area has subsided and is no longer a danger to you.

Warning (Watch & Act)

• An emergency is developing nearby. You need to take action now to protect yourself and others.

Emergency Warning

• You are in immanent danger and need to take action immediately.

Prepare to evacuate/evacuate now

• An evacuation is recommended or procedures are in place to evacuate.
Fire Agencies
- Saving life is the highest priority
- Issue advice and warnings
- Control and manage fire fighting activities
- Where safe to do so protect:
  - Identified community assets
  - Property
  - The environment

Victoria Police
- Protection of life and property
- Coordinate the registration process of evacuees
- Act on behalf of the Coroner if required
- Investigate criminal activity
- Coordinate traffic control

South Gippsland Shire
- Activates Municipal Emergency Management Plan
- Supports and works with Emergency Services and responding agencies
- Assists with provision of local information to the Community and Media
- Activates and supports emergency relief centres when required
- Assists and supports the community to recover from the emergency
Note: On Code Red days, Council services may not be available as usual

Venus Bay
- Residents and visitors, know your risk and act in accordance with the Fire Danger Rating triggers on pages 6 and 7
- Check on your neighbours
- Large amounts of traffic may be using local roads

Parks Victoria
- Rangers will patrol parks on High Fire Danger days
- Parks will be closed on Code Red days

Last updated Sep 2017 V5_00
WHAT TO DO

Leave Early

- When the Fire Danger Rating is Code Red, leaving early is always the safest option.
- Leave early destinations could include homes of families & friends who live outside the risk area, a nearby town or built up area.

Well Prepared

If leaving the high-risk area is no longer an option, there may be options close to where you are that could protect you. These include:

Your safety is

Always the safest option

For more information on how to prepare your own
www.cfa.vic.gov.au
VicEmergency Hotline
Options

- A well prepared home (yours or your neighbours’) that you can actively defend on Severe & Extreme Fire Danger Rating days only
- Private Bushfire Shelter (bunker) that meets current regulations
- Designated community fire refuge

not guaranteed

Last Resort

In situations where no other options are available to you, taking shelter in one of the below may protect from radiant heat:
- Neighbourhood Safer Place (place of last resort)
- Stationary car in a clear area
- Ploughed paddock or reserve
- Body of water (i.e. beach, swimming pool, dam, river, etc.)

High risk of trauma, injury or death

Bushfire Survival Plan:
1800 226 226
Survive

Community Fire Refuges

• A Community Fire Refuge is a place that is a building open to the public that can provide short-term shelter from immediate life-threatening effects of a bushfire event.
• There is no Community Fire Refuge located in Venus Bay.

Activate your bushfire survival plan early

• Remember, bushfires can happen when least expected. Planning and preparation are essential.
• A last-minute decision may cost you and your family your lives.
• You may not receive an official warning about a bushfire.
• Do NOT expect a fire truck at your property.
• Your survival and safety depend on the decisions you make.
• Protecting people will always be more important than property.
• Always tell someone what you are planning to do.
• Observe the weather, including the direction the wind is blowing.
• Watch what is happening around you and where a bushfire may be located.

Leaving late is DANGEROUS

• Travel on roads in this area during a fire is dangerous.
• You may be impacted by fire and visibility may be poor due to smoke.
• The roads may be blocked due to falling trees, collisions or emergency vehicles.
• Usual travel routes may not be available.
• Don’t assume you can turn back, as the road may have become blocked behind you.
• Lives are more likely to be lost when people make last-minute decisions to flee a bushfire.
• The risk of being overrun by a bushfire is real.
• People caught in the open are likely to face severe and often fatal levels of radiant heat.
• Leaving late is a DEADLY option.
There is no Neighbourhood Safer Place – Place of Last Resort in Venus Bay

It is important that you plan to leave early (see page 4). Assemble a relocation kit.

Your relocation kit

Have a relocation kit with essential items already prepared and make sure it is stored in an easily accessible place.

Some of the things that you might like to include in your kit are:

Relocation checklist

- Protective clothing made from natural fibres
- Woollen blankets
- Water and medications
- Toiletries and sanitary supplies
- Mobile phone and charger
- Important documents
- First aid kit
- Cash, ATM/credit cards
- Valuables and photos
- Battery powered radio
Attach Community Map file (jpeg at 300 dpi). CFA Regions to source & validate all Township map data layers per GIS

TPP Map Guidelines and supply to GIS HQ (N.Hutcheon@cfa.vic.gov.au). Community Maps to be developed by Spatial Vision. Township map extents will be established by CFA Regions in conjunction with GIS HQ from June 2011.

• Landscape Map Area: (H) 158 mm X (W) 285 mm.
• Ensure (where applicable) that all designated NSP-PLR are plotted within the Community Map.
• Ensure (where applicable) that all Leave Early Destinations are plotted or referenced with exploded text captions denoting distances.
• Ensure that exploded text captions are provided against all designated NSP-PLR locations denoted by the insertion of the NSP-PLR symbol detailing the NSP – PLR location name and NSP – PLR location address (where applicable).
• Ensure that main access & egress roads are highlighted within the Community Map.
• Ensure that exploded text captions are provided at either end of the Townships main access and egress roads denoting the next Townships name and distance in kilometers.
• CFA Regions to determine which neighbouring Township names should be provided in "exploded text captions" at either end of access and egress roads within the subject Township Community Map.
